

Lisbon International Hip Symposium

4th Edition

1st day | Thursday

08h30 Registration

08h45 **Welcome**
Paulo Rego

09h00 **Hip morphology - Update**
Moderator: Diego Collado

Hip anatomy - Relevant structures and function for hip preservation surgery

Paulo Rego

Hip vascular anatomy update: blood supply of acetabular labrum and surgical implications

Morteza Kalhor

Portals and normal arthroscopic anatomy of the hip

Luís Pérez Carro

Hip Imaging update

Vasco Mascarenhas

Dynamic ultrasound assessment of the adult hip

Michael Millis

Characteristics of pelvic tilt in young females with developmental hip dysplasia

Hui Cheng

Discussion

10h30 Coffee break

11h00 **Abnormal hip mechanics**

Moderator: Paulo Rego

Functional antetorsion of the femur - Position of the greater trochanter

Martin Beck

Hip function & torsional deformities of the lower limb

Paulo Rego

Combined hip version: relevance for FAI treatment

Filipe Oliveira

FAI - Pathophysiology & damage pattern

Michael Dienst

Discussion

12h00 **Patient selection & indications for hip preserving surgery**

Moderator: Óliver Marín-Peña

The painful hip - A plea for clinical examination

Hubert Nötzli

Hip arthroscopy: optimizing patient selection

Thomas Byrd

Osteoarthritis of the hip - When to scope, when to replace?

Michael Dienst

CAM femoroacetabular impingement: can we prevent arthritis?

Paul Beaulé

Discussion

13h00 Lunch

14h30 **Surgery for FAI: techniques & results - I**

Moderator: Hubert Nötzli

Surgical hip dislocation - Evolution of the technique

Diego Collado

Peripheral or central compartment approach: how to decide

Pedro Dantas

Cam impingement - Update

Marc Tey

Pincer impingement - Update

Pedro Dantas

Suture pattern strategies for arthroscopic hip labral repair

Thomas Byrd

Discussion

15h30 **Surgery for FAI: techniques & results - II**

Moderator: Paul Beaulé

Defining the parameters of quality for hip preservation surgery

Paul Beaulé

12 years results after surgical hip dislocation to treat FAI

Hubert Nötzli

Reverse PAO results for acetabular overcoverage

Michael Millis

Hip arthroscopy: Iberic Hip Preservation Group experience

Óliver Marín-Peña

Patient to patient support: optimizing outcomes in adult hip preservation surgery

Michael Millis

Discussion

16h45 Coffee break

17h15 **Special topics**

Moderator: Martin Beck

Hip arthroscopy in athletes: a personal journey

Thomas Byrd

Endoscopic sciatic nerve release: deep gluteal syndrome and ischiofemoral impingement

Luís Pérez Carro

Management of persistent pain after hip arthroscopy

Michael Dienst

Capsular arthroplasty for young patients with unilateral hip dislocation

Hui Cheng

Endoscopic treatment of proximal hamstring pathology

Jorge Cruz Melo

Hip abductors pathology

Marc Tey

Discussion

18h00 End of day 1

2nd day | Friday

08h30 **Live surgery & Cadaver demonstration**

12h00 Coffee break

12h30 **Children and adolescent hip - Update**

Moderator: Michael Millis

An update on slipped capital femoral epiphysis treatment

Paulo Rego

Surgical particularities in severely deformed chronic slips

Rheinold Ganz

Pattern of impingement in valgus slipped capital femoral epiphysis

Morteza Kalhor

Head-neck deformities other than slips

Rheinold Ganz

Head reduction osteotomy: a true treatment alternative in Perthes disease

Diego Collado

Computer simulation and jig assisted femoral head osteotomy in severely deformed Perthes hips

Rheinold Ganz

Discussion

14h00 Lunch

15h00 Hip instability & dysplasia

Moderator: Paulo Rego

A new comprehensive classification for acetabular dysplasia

Paul Beaulé

How to assess instability of the hip?

Martin Beck

Technical challenges in rectus sparing PAO: a cadaveric study

Morteza Kalhor

Hip dysplasia: arthroscopy vs osteotomy

Michael Dienst

Longterm outcomes of periacetabular ostectomy

Michael Millis

Results of simultaneous acetabular and femoral surgery in severely deformed pediatric hips: case reports

Rheinold Ganz

Discussion

16h30 Coffee break

17h00 Hip replacement: perspective of a hip preserving surgeon

Moderator: Pedro Dantas

Current indications for hip resurfacing: surgical technique and implant design

Paul Beaulé

Anterior approach for total hip replacement

Pedro Pinto

Total hip replacement in hip dysplasia

Hubert Nötzli

Bone preservation in total hip revision surgery

Hubert Nötzli

Discussion

18h00 **Closing remarks**

Paulo Rego

Chairman:

Paulo Rego (PRT)

Speakers:

Diego Collado (ESP) | Filipe Oliveira (PRT) | Hubert Nötzli (CHE) | Hui Cheng (CHN) | Jorge Cruz Melo (PRT) | Luís Pérez Carro (ESP) | Marc Tey (ESP) | Martin Beck (CHE) | Michael Dienst (DEU) | Michael Millis (USA) | Morteza Kalhor (IRN) | Óliver Marín-Peña (ESP) | Paul Beaulé (CAN) | Pedro Dantas (PRT) | Pedro Pinto (PRT) | Rheinold Ganz (CHE) | Thomas Byrd (USA) | Vasco Mascarenhas (PRT)

LUZ SAÚDE

Lisbon International Hip Symposium

4th Edition

14th and 15th November, 2019

Hospital da Luz Lisboa auditorium

- + Hip morphology - Update
- + Abnormal hip mechanics
- + Patient selection & indications for hip preserving surgery
- + Surgery for FAI: techniques & results
- + Special topics
- + Live surgery & Cadaver demonstration
- + Children and adolescent hip - Update
- + Hip instability & dysplasia
- + Hip replacement: perspective of a hip preserving surgeon
